

BATTERIES NOT INCLUDED, SOME ASSEMBLY REQUIRED

there in lies the awful truth
that man is nothing more than primate with a keen sense
of self-awareness and the opposable thumb

there are those who have become adept at thinking
on the verge of crossing the line that seperates us from the gods
names like kerouac, ginsberg, dylan
tesla, einstein, edison

then there are those who let others do their thinking for them
they insist that man is above and beyond the laws of nature
in order to fulfill self-centered thoughts of grandiose delusion

but even this talk of psychology and poetry
comes from nothing more than being aware of yourself
no matter what you say or think
remember that because you can think,
it doesnt make you better than those who cant
or dont

square minds that fit in boxes
e control command q
x propaganda u
o politics religion a
b sale on brainwashes r
-----that contain nothing---- e

round pegs will fit in square holes if the hole is big enough
but circles inherently have more area
so thinking outside the box is natural

while we may all be talking monkeys
its ironic that the monkeys are more human
than some of us
